

Inmarsat Regional BGAN

- **Mobile Satellite Data Transfer at up to three times the speed of GPRS**
- **Network coverage in 99 countries, with global service planned from 2005**
- **Packet data service, with usage charges for amount of data transferred, not time spent online**
- **Usage costs up to 40% cheaper than GPRS roaming**
- **Broadband connectivity from 144Kbps to 400Kbps dependent on location**
- **Email, web browsing, voice, VoIP, FTP, data and image transfer, SMS messaging**
- **Easy Installation—plug and play (Bluetooth, Ethernet and USB)**
- **Portable—as small as a notebook PC and lightweight**

User Interfaces: Bluetooth, USB , Ethernet

Compatibility : Regional BGAN is compatible with Microsoft Windows 98, Millennium Edition (ME), 2000, XP, NT and Mac OS 10.1. It also provides remote LAN and intranet access, and enables dedicated, secure links to be set up over a virtual private network (VPN)

IP Communication: Up to 144 kbps (GPRS-based Data only solution)

Secure Communication: VPN connectivity through fixed IP addresses

Lightweight: 1.6 kg

Battery: Comparable life to notebook PC (Spare batteries and solar panel charger available)

Accessories: External antenna, carry case and charger available

Robust: Dust and water spray proof for outdoor use

Satellite: Inmarsat I4

Dimensions: 300mm x 240mm x 40mm (11.8" x 9.4" x 1.6")
